Department of Computer Science and Engineering

To whom it may concern

This is to certify that Ms. Bratati Ghosh has worked under my supervision during the period of May 2019-June 2020 as a part of her final year project. Bratati was a student of Government College of Engineering & Ceramic Technology, Kolkata, West Bengal. In this work, her focus was on forecasting air pollutants.

Bratati is an intelligent, sincere and hardworking student. She is very academic minded and enjoy coding. I observed that she is capable of thinking and acting on an independent basis and involving herself whole-heartedly in her work.

Bratati communicates effectively both orally and in writing. I see her as a promising young mind, who can contribute and enrich the field of study she desires to work in. I wish her all the best in her future endeavors.

Thanking you,

Regards,

Sarbani Roy

Professor

Department of Computer Sc. & Engg.
